

## Facts about Danisco Shanghai Center

The new Danisco Shanghai Center brings together:

- The innovation and application laboratories previously located in Kunshan, Jiangsu Province
- The sales offices of Danisco, Danisco Animal Nutrition and Genencor in Shanghai
- A new Genencor R&D centre

The centre will be the only Danisco site in Shanghai. This one-city-one-site principle has been implemented successfully in Singapore and Paris, France.

The consolidation of the three sales offices will create synergy, integrate administration and sales and marketing platforms, resulting in increased efficiency.

The centre is located in the Hongqiao International Business Park (IBP) close to Hongqiao Airport.

The centre is a five stories building of almost 5.600 m<sup>2</sup>.

First floor includes lobby area, meeting rooms, conference facilities and the Dairy and Ice Cream application laboratories.

Second floor will be occupied with the remaining food innovation laboratories.

Third floor will include the Danisco food ingredients sales offices and meeting rooms as well as IT and HR.

Fourth floor will be for the Genencor and Danisco Animal Nutrition sales people.

Fifth floor will be dedicated to the new research centre in biotechnology and enzyme development. This will be the Asian addition to the already existing R&D centres that the Genencor division has in the USA and Europe.

Danisco Ingredients came to China in 1995. Currently Danisco has 1,224 employees in the country and the following sites:

Factories:

- Kunshan (emulsifiers, functional systems)
- Wuxi (enzymes)
- Anyang (xylitol)
- Zhangjiagang (CMC)

Sales offices:

- Shanghai

- Beijing
- Guangzhou

The food ingredients application laboratories in Danisco Shanghai Center cover dairy, cultures, ice cream, beverages, bakery, confectionery, jams, desserts, brewing, meat, food safety & protection, phage testing and sensory testing.

The Genencor division, to operate the R&D facilities on the fifth floor is the home of industrial enzymes capabilities within Danisco. Genencor is one of the largest developers and manufacturers of industrial enzymes. It delivers solutions for the agri-processing, cleaning and textiles, food and feed, consumer, and industrial markets. It also develops innovative advancements for the biofuels, biodefense, and biosafety industries.
